

SMEAL R2 HYDRAULIC PUMP HOIST

The Smeal R2 is the service rig designed with economy in mind. The R2 is lightweight (less than 1,200 lbs) and is designed to mount on mini pickups thereby offering low initial cost and good fuel economy.

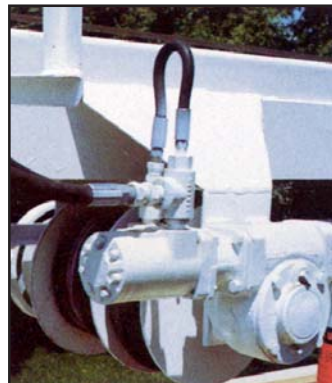

Totally enclosed oil bath gears and hydraulic drawworks give this rig a long life with low maintenance cost. This is the ideal rig for submersibles and small pump service.

Controls are conveniently located to be easily accessible to the operator.

Simple yet effective scoping clutch assembly allows hook to remain stationary as the boom is scoped up and down.

Positive lock worm gear reduction provides a positive hold on the hook.

Large portion of truck bed space remains available for storage or hauling purposes.

Standard Features:

- 1000 lb single line capacity at 75 ft per minute.
- 2000 lb capacity with two-part line.
- 30 ft. power scoped mast.
- 6 ft layback
- Automatic speed control.
- Independantly controlled hydraulic outriggers.
- White paint

Optional Features:

- Remote control
- Tailgate
- Longer outrigger jacks
- Electronic speed control
- Different paint color
